With LASER TYPE time-saving with automatic "plate mode".

## Serialization Wizard

Create plates of the same theme with different variables all at once.

**Save time and gain productivity with LASER TYPE wizards!**

International standard Bar codes provided

Edit Bar Codes with one click.

DataMatrix and Bar codes Wizards

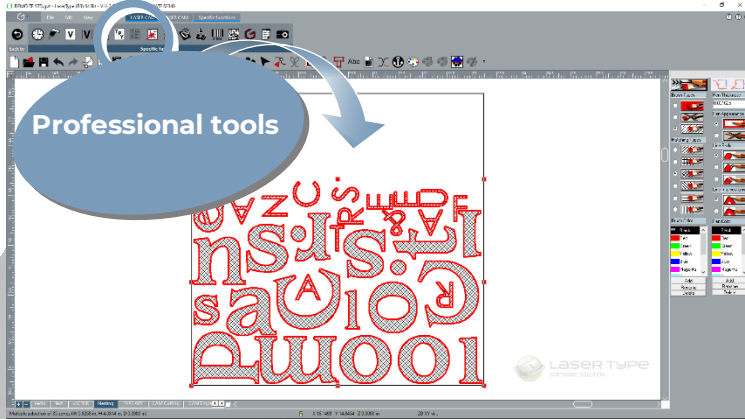

Today TYPE3 puts this incomparable know-how into offering you powerful and complete Laser software solution. Here are just some of its numerous features:

- Geometrical shape tools for drawing any kind of shape (sketching tool, star, circle, arrow, and more.)
- Stamp wizard
- Symbol and font libraries
- Automatic layout/templates
- Editing tools/Cleaning tools (Point mode)
- Numerous import filters: DXF, IGES, BMP, EPS, DXF3D, STL, Points of cloud etc.
- Artistic 3D creation tools
- Texturing
- Specific Job tools: Nesting, Ridge, Dials wizard

## Optimize Materials

And cut costs with the powerful Nesting features helping minimize material waste.

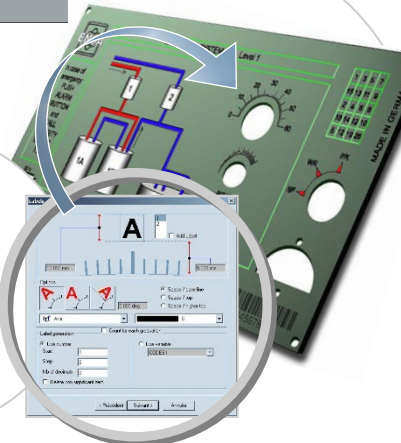

Professional tools

**Create instantly dials and rulers and raise productivity**

In simply using automatic dials functions to generate watch dials, machine front panels, etc.

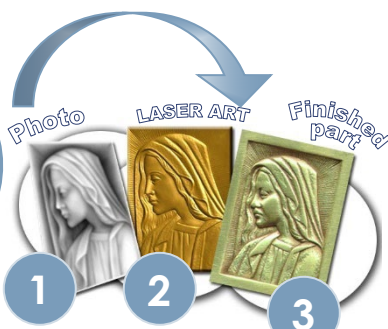

Parametric properties to re-edit your creations

## CAM module

- specialized toolpaths
- Marking, Hatching
- Cutting, deep engraving
- 3D engraving

The bridge to laser engraving and 3D sculpting

Enter the world of 3D with **LASER ART Artistic features.**

Enhance your productivity & possibilities with this LASER TYPE powerful and intuitive module.

**Take competitive advantages with LASER TYPE quick and optimized machining**

Thanks to the dedicated laser toolpaths, from 2D to 3D.

## From draft to finished piece

LASER TYPE has been developed to take you through the entire creation process: from draft to finished project. You will work faster with accuracy and security, cut costs and expand into new markets !
